SBS Sokuhai Support Co., Ltd.

## Launch of “SBS Eco-Logi Delivery,” a New Contactless Delivery Service

- To build a sustainable delivery service -

The SBS Group (Representative: Masahiko Kamata; Head Office: Shinjuku-ku, Tokyo) is pleased to announce that it will launch a new sustainable delivery service, “SBS Eco-Logi Delivery,” on November 1, 2024.

The SBS Group is undertaking various efforts to respond to recent social demands, including the 2024 problem, and to improve services for customers using logistics services. More specifically, a study by the Ministry of Land, Infrastructure, Transport and Tourism showed that CO2 emissions due to re-delivery exceed 250,000 tons per year(\*), so we recognize that reducing the re-delivery rate is an urgent issue.

Under these circumstances, SBS Sokuhai Support Co., Ltd. (President and Representative Director: Masahiko Kamata; Head Office: Koto-ku, Tokyo), which provides same-day delivery services in the Group, will begin offering a new sustainable contactless delivery service, “SBS Eco-Logi Delivery,” that will contribute to the global environment, reducing the number of re-deliveries by encouraging users to use the “contactless delivery service” while meeting the demand for E-Commerce Home delivery that has been rapidly growing in recent years.

“SBS Eco-Logi Delivery” Logo

Fumiya Takahashi, SBS Group Image Character

“SBS Eco-Logi Delivery” is a sustainable delivery service that, on the premise of contactless delivery, achieves the following three goals: (1) delivery at a reasonable price, (2) reduction of CO2 emissions by reducing re-delivery occurrences, and (3) resolution of the problem of driver shortage. The service will be launched in Tokyo and three other prefectures of the Kanto region, with the aim of expanding nationwide by taking full advantage of the Group’s synergies.

The SBS Group’s Mid-Term Management Plan, “SBS Next Stage 2025”, calls for the “development

of eco-friendly logistics facilities and transportation/delivery systems.” This service is intended to promote the implementation of the Mid-Term Management Plan, and we will work to strengthen sustainable management and provide high-added-value services for our users by developing and presenting delivery methods with a low logistical load,
